Summary

UX/UI Designer with Medical Engineering and Data Processing background (B.Sc. MU Egypt + M.Sc. FAU Germany), specializing in healthcare and AI-powered product design. Google UX Design certified with master's thesis on Large Language Models in medical imaging. Proven ability to design enterprise platforms achieving 30% efficiency gains and consumer apps addressing complex user needs. Delivered 4 complete projects across healthcare, E-commerce and legal sectors.

Professional Experience

UX Content Creator | Siemens

2023 - Present

- Designed and implemented M365 documentation system serving 500+ employees, reducing IT support tickets by 40% through improved UX writing and information architecture

Brand Designer (Freelance)

2018 - 2022

- Delivered 4 complete brand identities for clients across healthcare, legal, and e-commerce sectors with comprehensive visual systems including logos, color palettes, and typography guidelines
-

Certifications

Google UX Design Professional Certificate | Google | 2025

- Completed 6-month intensive program with 3 capstone projects; mastered design thinking, accessibility, and responsive design
-

Education

M.Sc. Medical Image & Data Processing

Friedrich-Alexander-Universität (FAU), Erlangen-Nürnberg, Germany

2022 - 2025

Thesis: Enhancing Image-to-TikZ Code Generation via Large Language Models Knowledge Distillation

- Implemented knowledge distillation framework transferring knowledge from large to lightweight language models for efficient TikZ code generation
- Coursework in Human-Computer Interaction and Graphical Design sparked passion for UX/UI design

B.Sc. Biomedical Engineering

Mansoura University, Egypt

2017-2022

- Foundation in biomedical systems, medical device design, and healthcare technology
-

Featured Projects

ZazouLaw - Legal Services Mobile App | 2025

- Created Egypt's first comprehensive legal services app with Arabic-first design and full RTL support
- Designed transparent lawyer booking and real-time case tracking from user research with 12+ clients

RadiView - AI Medical Imaging Platform | 2025

- Designed enterprise radiologist workflow platform reducing diagnostic time by 30% through AI-powered case prioritization and unified dashboard
- Created information architecture managing 500+ daily medical images; conducted stakeholder interviews with 8 radiologists

ChemistryHub - Gamified Learning Platform | 2023

- Designed mobile EdTech app reinventing chemistry education through gamification and AI-generated adaptive questions
- Conducted user research with 15+ students; created visual lesson system with progress tracking and personalized learning paths

Qawafel - B2B E-commerce Platform | 2021

- Designed bilingual wholesale platform connecting 100+ vendors with business buyers across Middle East
 - Created comprehensive vendor dashboard managing technological, financial, marketing, and logistical solutions
-
