PROFESSIONAL SUMMARY

UI/UX and Product Designer with a biomedical engineering background and an M.Sc. in Medical Image & Data Processing, combining user-centered design, healthcare domain knowledge, and AI-driven product thinking. Experienced in information architecture, UX writing, design systems, wireframing, prototyping, and stakeholder-centered workflow design. Brings practical experience from Siemens knowledge management work, brand identity projects, and product concepts across legal tech, healthcare, education, and B2B platforms.

PROFESSIONAL EXPERIENCE

UX Content Creator | Microsoft M365 Specialist (Working Student) | Siemens AG *Apr 2023 – Present*

- Worked with Microsoft 365 tools to support knowledge management and collaboration, including Word for the web, Teams, Outlook, OneNote, and Loop.
- Created and maintained shared knowledge content using Microsoft 365, enabling a single source of truth and real-time collaboration across teams.
- Improved content discoverability, reuse, onboarding clarity, and cross-team collaboration through structured information architecture and UX writing.
- Created FAQs, tutorials, and internal knowledge materials that reduced recurring support requests and improved self-service learning.

Brand Designer (Freelance) | Freelance *2018 – 2022*

- Delivered complete brand identities for clients across healthcare, legal, and e-commerce sectors, including logos, typography, color systems, and brand assets.
- Managed the full client communication cycle from discovery and concept presentation to iteration and final delivery.

Graphic Design Intern | Optimistech Co-working Space, Egypt *Aug 2021 – Dec 2022*

- Designed social media visuals and brand identity materials for multiple companies and campaigns.

Marketing Director | Turning Point Conferences *Apr 2019 – May 2021*

- Planned and oversaw marketing strategies across 3 conference editions, designed printed and digital materials, and mentored junior team members.
- Delivered 3 graphic design training sessions for new media committee members.

SELECTED PROJECTS

RadiView – AI Medical Imaging Platform | Product Design *2025*

- Planned an enterprise radiologist workflow platform aimed at reducing diagnostic time by 30% through AI-powered prioritization and a unified dashboard.
- Structured information architecture for 500+ daily medical images and conducted stakeholder interviews with 8 radiologists.

ZazouLaw – Legal Services Mobile App | Product Design *2025*

- Designed an Arabic-first legal services app with full RTL support, transparent lawyer booking, and real-time case tracking.
- Used research insights from 12+ clients to shape features and build trust-focused user flows.

ChemistryHub – Gamified Learning Platform | UX/UI Design *2023*

- Developed a mobile EdTech concept using gamification and AI-adaptive questions to improve engagement.
- Conducted user research with 15+ students and designed progress tracking and personalized learning experiences.

Qawafel – B2B E-commerce Platform | UX/UI Design

2021

- Designed a bilingual wholesale platform connecting 100+ vendors with business buyers in the Middle East.
- Created a vendor dashboard covering technological, financial, marketing, and logistics workflows.

EDUCATION

M.Sc. Medical Image & Data Processing | FAU

2022 – 2025

- Coursework in Human-Computer Interaction and Graphical Design strengthened interest in UX/UI design.
- Academic exposure to medical imaging and data processing supports healthcare UX and complex product workflows.
- Thesis focused on LLM knowledge distillation for efficient technical generation systems.

B.Sc. Biomedical Engineering | Mansoura University, Egypt

2017 – 2022

- Built a foundation in biomedical systems, medical devices, and healthcare technology relevant to healthcare product design.

SKILLS

Design Tools: Figma (Advanced), Adobe XD, Photoshop, Illustrator, InDesign, Premiere, After Effects, CapCut

UX / UI Methods: User Research, Competitive Analysis, Personas, Journey Mapping, Wireframing, Prototyping, Usability Testing, Information Architecture, Interaction Design, Design Systems, UX Writing

Specialized: Healthcare UX, AI Product Design, Arabic / RTL Design, Dashboard Design, Gamification, B2B Platforms, Brand Identity

Technical: HTML5, CSS3, Responsive Design, Python, Microsoft 365, Medical Imaging, Data Processing

AI Knowledge: LLMs, Prompt Engineering, Machine Learning, Deep Learning, LangChain, AI-assisted workflows

Languages: Arabic (Native) | English (Fluent) | German (Intermediate)

TRAINING & CERTIFICATIONS

Google UX Professional Certificate | Google / Coursera

Certificate

- Completed 6 courses focused on user-centered problem solving, research methods, ideation, wireframing, prototyping, and usability evaluation.
- Built 3 projects using a structured design approach to analyze user needs, improve system workflows, and develop effective digital solutions.

VOLUNTEER WORK

Marketing Director & Graphic Designer | Revive Team, Mansoura University

Apr 2020 – Feb 2022

- Created marketing plans for student initiatives and designed a mobile application concept for biomedical engineering students.
- Combined communication strategy with design execution across awareness and student-engagement initiatives.

Media Director & Graphic Designer | Y-PEER Egypt

Jun 2019 – Oct 2022

- Designed 35 campaign visuals and photographed training events, contributing to communication and outreach impact.

Graphic Designer & Video Editor | Etijah Organization, Egypt

Jun 2019 – Oct 2022

- Completed 250+ hours of community service, produced awareness content, and supported COVID-19 communication campaigns.
- Mentored a community service camp for HEI scholarship students.
